Linear Model – 25 pts

Question 1

1. 4 pts. Read in the data called "PlantEmergence.csv" using a relative file path and load the following libraries. tidyverse, lme4, emmeans, multcomp, and multcompView. Turn the Treatment , DaysAfter-Planting and Rep into factors using the function as factor

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

summary(cars)

```
##
        speed
                         dist
##
    Min.
           : 4.0
                   Min.
                           :
                              2.00
                    1st Qu.: 26.00
##
    1st Qu.:12.0
    Median:15.0
                   Median : 36.00
           :15.4
                           : 42.98
##
    3rd Qu.:19.0
                    3rd Qu.: 56.00
   Max.
           :25.0
                   Max.
                           :120.00
```

Including Plots

You can also embed plots, for example:

Note that the echo = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.
